### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-7 and 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kirckof (US Patent No 6,488,890).

Kirckof teaches a method and a system as claimed. See entire document, especially columns 1-4, 7-25 and Examples.

3. Claims 1, 2, 4, and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson (US Patent No 5,759,486).

Peterson teaches a method and a system as claimed. See entire document, especially column 13, lines 47-50.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Page 3

Application/Control Number: 10/613,276

Art Unit: 1746

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 6. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. Claims 8-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirckof.

Kirckof does not specifically recite six claimed cycles, but recites different cycles with different chemicals at different temperatures. Kirckof further discloses that strips for different processes were known in the art and incorporates the teaching of the patents directed to such strips. Kirckof further teaches control of processes, which are conducted at the claimed temperatures, such as ethylene oxide sterilization.

Application/Control Number: 10/613,276

Art Unit: 1746

Having the teaching of Kirckof it would have been obvious to an ordinary artisan at the time the invention was made to control any treatment cycle disclosed by Kirckof and the incorporated documents with strips and device disclosed by Kirckof and the incorporated documents.

#### Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents Re34,515; 4,232,552; 4,410,493; 5404,834; 4878,588; 2,308,087; 3,324,723 and 4,353,990 and WO 95/24622 are cited to show the state of the prior art with respect to method and devices for controlling temperature during treatments.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
